

Mohammed Jasim

Flutter Developer | Mobile Application Specialist

Email: jasim.mohammed.dev@gmail.com, **Mobile :** +91 7034826994, **LinkedIn:** <https://www.linkedin.com/in/jasim-dev>, **Location:** Kerala, India

PROFESSIONAL SUMMARY

Flutter Developer with hands-on experience in building high-performance, cross-platform mobile applications using **Flutter** and **Dart**. Proven expertise in **UI/UX** implementation, **state management**, RESTful API integration, and responsive design. Skilled in developing scalable, maintainable codebases using modern architectural patterns such as MVVM and Clean Architecture. Experienced in Firebase integration, authentication systems, real-time databases, and cloud services. Adept at debugging, performance optimization, and collaborating with cross-functional teams to deliver high-quality mobile solutions on time. Passionate about creating seamless user experiences and leveraging emerging technologies to drive innovative, user-centric applications.

EXPERIENCE

Flutter Developer

MICTCO Technologies — Kerala, India

Jun 2025 – Present

- Developed and maintained cross-platform mobile applications using Flutter and Dart, ensuring high performance, scalability, and code quality.
- Implemented state management solutions (Provider, Riverpod, Bloc) to improve app performance, maintainability, and UI responsiveness.
- Integrated RESTful APIs and third-party services, handling JSON parsing, error handling, and secure data transactions.
- Utilized Firebase services including Authentication, Firestore, Realtime Database, Cloud Messaging (FCM), and Crashlytics for real-time features and app stability.
- Applied clean architecture principles and followed SDLC best practices, including Agile/Scrum, Git version control, and CI/CD pipelines for efficient development workflows.
- Optimized application performance through efficient memory management, code refactoring, and widget tree optimization to reduce load times and improve user experience.
- Implemented secure authentication and authorization flows using OAuth, JWT, biometrics, and role-based access control (RBAC).
- Built responsive and adaptive UI components using Material Design and Cupertino widgets to ensure seamless performance across Android and iOS devices.
- Implemented local data persistence and offline support using Hive, SharedPreferences, and SQLite to ensure reliable application behavior in low or no-connectivity scenarios.
- Participated in code reviews and documentation efforts to improve coding standards, knowledge sharing, and long-term maintainability of mobile applications.

Junior Flutter Developer

Oxdo Technologies — Kerala, India

Jan 2025 – May 2025

- Collaborated with product, design, and QA teams to translate Figma/UI wireframes into functional, production-ready Flutter screens with consistent design quality.
 - Implemented local data storage solutions using Hive, SharedPreferences, and SQLite to enhance offline accessibility and data persistence.
 - Developed modular, reusable widgets and components, improving development speed and reducing UI inconsistencies across the application.
 - Integrated push notifications, in-app messaging, and background services, ensuring seamless communication and improved user engagement.
 - Improved app reliability and crash-free rate by debugging complex issues using Flutter DevTools, logs, performance overlays, and Crashlytics reports.
 - Ensured app security and compliance by implementing input validation, data encryption, secure API handling, and best practices in mobile security.
 - Participated in code reviews and pair programming, contributing to better coding standards, maintainability, and team knowledge sharing.
 - Worked with version control workflows (Git, GitHub, GitLab) including branching strategies, merge requests, and resolving conflicts efficiently.
-

TECHNICAL SKILLS

Flutter development and State Management

- **Flutter UI Development:** Responsive Layouts, Custom Widgets, Clean Architecture, Reusable Components, Performance Optimization, Cross-Platform Mobile App Development.
- Provider, Riverpod, Bloc, MVVM Architecture, Separation of Concerns, Scalable Folder Structure, Dependency Injection, App Lifecycle Management.
- **Project Tools:** Android Studio, VS Code, Git & GitHub, Firebase Console, Figma.

Software Development

- **Frontend Technologies:** Dart, Flutter, Responsive UI Design, Custom Widgets, Cross-Platform Mobile Development.
- **Backend Technologies:** REST APIs, Firebase (Authentication, Firestore, Cloud Messaging), JSON Parsing, Secure API Integration.
- **Database and DevOps:** Firestore, Realtime Database, Local Storage (SharedPreferences), Git Version Control, Agile SDLC.

Productivity and Collaboration Tools

- GitHub, Android Studio, Microsoft Visual Studio, Microsoft Word, Microsoft Excel, Microsoft Teams, Slack, Google Docs and Google Sheet.

EDUCATION

Bharathiar University — *Bachelor of Commerce*

Nov 2022 – Nov 2024, India

PROJECTS AND ACHIEVEMENTS

- **FEEDO – Food Donation & Sharing App:** Developed a community-driven mobile application using Flutter and Firebase, enabling users to donate and request food in real time. Implemented Firebase Authentication and Firestore backend for secure user management and live data synchronization, improving accessibility and coordination for food sharing.
- **CRM Ticket Raising Application:** Designed and developed a Flutter-based CRM application with REST API integration for ticket creation, tracking, and issue management. Streamlined communication workflows and improved issue resolution efficiency through structured ticket categorization and status tracking.
- **Weather Application:** Built a real-time weather application using Flutter with third-party REST API integration. Implemented dynamic UI updates based on live weather data, enhancing user experience through accurate and responsive information display.
- **Deep Cafe Restaurant Application:** Developed a restaurant management and ordering application with Flutter, focusing on intuitive UI design and smooth navigation. Improved customer interaction by presenting menu listings, order flows, and business details in a user-friendly format.
- **Deep Cafe Restaurant Application:** Developed a restaurant management and ordering application with Flutter, focusing on intuitive UI design and smooth navigation. Improved customer interaction by presenting menu listings, order flows, and business details in a user-friendly format.
- **Aether Wellness Application (UI Development):** Designed and implemented modern, responsive UI screens for a wellness-focused mobile application using Flutter. Emphasized clean layouts, reusable widgets, and consistent theming to enhance visual appeal and usability.
- **Deep Local Authentication Login Module:** Implemented a secure local authentication system using Flutter, enabling biometric and device-based authentication. Enhanced application security and user convenience by integrating fingerprint and local device authentication features.
